Michael Burgan has written more than two dozen biographies for young readers. HisÂ Breaker Boys, about photographer Lewis Hine and his depiction of child labor, was named one ofÂ SLJ's 20 Outstanding Nonfiction Books of 2013.

The Who Was series is a great learning tool for kids and adults alike. The books are easy to read with great artwork included. As my kids and I read these we learn so much. This book about Henry Ford was fun. We liked learning how he built his empire and was the leader in the assembly line as well the automobile industry. We also learned he had a particular stance on Jews. I never knew that about him.

This book was just what I needed for supplementary reading for my adult literacy student--middle grade reading level and adult interest level. The author presents an engaging story of Henry Ford's life and his place in American history. The book is illustrated by excellent line drawings on almost every page. The prose is straight forward with plenty of new words to expand the student's working vocabulary and to inspire discussion. I plan to use other books from the "Who Was..." series with adult English learners eager to learn about the history of their new country.

I restore Model T Fords and want my grandkids to understand how they came about and how they influenced the making of the automobile, the production line and the automobile industry in the USA but the world. My daughter has established a very nice kids library and that is what these books are for. Daughter loves the book, nice addition to the "Who Was" series

It has a lot of information and it really helped me with my report. It gets a bit confusing but overall very easy to read.

I am happy with my purchase

Bought for my son to do his Henry Ford school project. Great book, well written and easy to understand for a 5th grader. He got an A on his project and then I donated the book to his classroom.

My son doesn't generally enjoy reading so when I picked up a few of these books to give it a try, he loved them. I now own over 30 of them, and each one has been fun to read. My son started testing them in 5th grade. I highly encourage people to purchase these books.
