Warner, MD (Houston, TX) is Assistant Professor, Division of Critical Care Medicine, at the University of Texas Medical School at Houston.

Hits the bread and butter medicine. Gives you great scope of what is important for medical school knowledge level. Will help you confidently select the next step in the treatment algorithm during the exam. Every clerkship that I use case files to augment UWorld, I ace the shelf.

Arrived on time and as stated in perfect condition. So far the cases have been helpful and comprehensive. 3-5 practice questions at the end of each case provide solid explanations both why an answer is correct and why incorrect answers are wrong. Nice index at the back for quick reference.

great price

Love the series

Helped me score above average on my shelf

The delivery was on time and good

The Case Files series have been the mainstay of my study routine for my junior clerkships in medical school. But this one has SOOOO many typos that it makes me question the validity of the content. It is peppered with misspelled words, unfinished sentences, there's one spot where the author actually left a note to himself to look up whether or not a comma was used appropriately. It's like the rough draft went into publication. I plan on continuing to use Case Files, but I'm pretty disappointed with this one.

Great review of Internal Medicine that actually makes you think about what you would do for that patient rather than just bullet points. I like that it doesn't always give you every bit of information you need and makes you narrow/confirm your ddx with further tests. Much more clinically useful than reading review books that are usually exam focused.
