The Innings And Outs Of Baseball (Science Of Fun Stuff)

Synopsis

Learn the fascinating science behind baseball in this fact-tastic nonfiction Level 3 Ready-to-Read, part of a series about the science of fun stuff! Did you know that every time you watch a baseball game, you are watching some great examples of physics in action? Why exactly does the amount of spin on a pitch determine how far a ball can be hit? And what's the scientific reason that using pine tar on the bat makes it easier to grip? Learn all about the science behind America's favorite pastime in this fun, fact-filled Level 3 Ready-to-Read! A special section at the back of the book includes Common Core "vetted extras on subjects like anatomy and history, and there's even a fun quiz so readers can test themselves to see what they've learned!

Grade Level: 1 - 3

Customer Reviews

Jordan D. Brown loves to write about science for kids, and is the author of *Micro Mania*, *Crazy Concoctions*, and *Robo World*. He's also the educational advisor for TV shows such as *Dinosaur Train* and *My Little Pony*. Jordan lives in Walker Valley, New York, with his wife Ellen, two children, and two dogs. Dagny Downey is an illustrator, storyboard artist, graphic novelist, and bluegrass musician. He often works late into the night, where he gets all his good ideas "when he's not chasing raccoons out of the yard. He's currently working on illustrating and writing more books

for kids based on his rock band days. As a kid he wanted a pet raccoon, but not anymore.

My second grade twin grandsons loved trading it.

My 7 year old loves this book! He has re-read it multiple times!

. Our grandson likes baseball and science so it's the perfect combination.

This was a gift for a boy who loves baseball but has a hard time reading. This encouraged him plus taught him some stuff on top of it.

My grandson is really into baseball. He is enjoying the book on his favorite subject. Easy 2 read n understand 4 a young child.

Out ball playing grandson liked it.

fair

Its a gift that has not been read yet. I think it depends on your child's education lever (not age). I expect my 8 year old to understand it. But for \$4.00, its worth a try.
