For less than the cost of a box of American made ammo, you could outfit your survival gear with some to-the-point literature can make a difference when on an afternoon hike, or when the S really hits the fan.â •â “ Doc Montana, a Contributing Author of Survival Cache and SHTFBlog (Doc Montana Survival Gear Review: Survival Guides to Edible and Medicinal Plants of the Rocky Mountains)

nice pocket size and waterproof, hope not be allergic to anything I try eating or get sick bringing my TP

I take it every where.

great

A folding plastic page. \$7 something dollars

This pamphlet is going to become a regular part of my outings. It is written simply, yet covers how to use the often common plants to deal with issues, should they happen. It has a water resistant coating on the pages so you don't have to worry about it getting stuff on it. It can just be wiped off. Lastly I am impressed with it's small size. It doesn't take up a bunch of room or weight in my pack. Then when I'm not out in mountains it stores very neatly in my glove box in the suv.
