# Safari Park (Great Source Mathstart)

## Synopsis

It's 4 tickets for the Treetop Coaster! Just 2 for the Elephant Twirl! five cousins each have 20 tickets to spend at Safari, and a little algebra will tell them how many rides they can try. But who will dare the death-defying Terrible Tarantula?

## Book Information

Series: Great Source Mathstart

Paperback: 40 pages

Publisher: GREAT SOURCE; 1 edition (November 1, 2002)

Language: English

ISBN-10: 0064462455

ISBN-13: 978-0064462457

Product Dimensions: 9.8 x 0.1 x 8 inches

Shipping Weight: 5.6 ounces (View shipping rates and policies)

Average Customer Review: 4.1 out of 5 stars 6 customer reviews

Best Sellers Rank: #808,411 in Books (See Top 100 in Books) #106 in Books > Children's Books > Education & Reference > Math > Algebra #379 in Books > Children's Books > Education & Reference > Math > Arithmetic #2916 in Books > Children's Books > Sports & Outdoors

Age Range: 6 - 10 years

Grade Level: 2 and up

## Customer Reviews

Grade 2-3-Safari Park has just opened, and Grandpa has 100 free tickets that he divides evenly among his five grandchildren. With rides and games costing one, two, four, or six tickets each and a treat costing one, careful planning and figuring are needed. Suddenly, Paul realizes that he has lost his tickets, so the others must share theirs with him. Each child's choices are discussed, with Paul being disappointed that he doesn't have enough for the Terrible Tarantula. When given a ticket for the Rock Toss, he carelessly participates in the game but wins 18 free tickets, and then, on a repeat try, gets 18 more. Now everyone can ride the expensive Tarantula. A two-page addendum suggests additional ways to use the book and its mathematical concepts. The colorful but slightly garish cartoon illustrations add humor to the necessary, but tedious, work of making choices within the restrictions of an allotted budget. Good for a math lesson or independent reading, but too detailed and involved for a read-aloud. Nancy A. Gifford, Schenectady County Public Library, NY Copyright 2002 Reed Business Information, Inc.

Ages 6-9. From the MathStart series, this story begins with Grandpa taking his five grandchildren to the opening of Safari Park. Though each child starts out with 20 free tickets for rides, Paul promptly loses his. Grandpa decrees that each cousin must take Paul on a ride, which might take 2, 4, or 6 tickets. Other treats, such as food and games, cost 1 ticket. As they go through the day, intense mathematical calculations ensue as the kids figure out what they have spent, how much is left, and how they can spend it. The math is worked out visually on the pages, illustrated by lively, colorful ink-and-wash drawings. Younger children may enjoy this picture book as one of the few taking place at an amusement park; older students are more likely to take on the mathematical challenges presented. As Murphy notes in the two appended pages of complementary activities and suggested reading, this book offers experience in finding a missing element, "an important step in the development of algebraic thinking." My children (ages 6 and 4) and I enjoy most of the Stuart J. Murphy Math Start books that we have read. In each one there is a single math concept taught in the format of a read aloud book. In this one, a grandfather is taking his 5 grandchildren to the Safari Park on opening day. He has 100 tickets, but one child loses his. The others have to share one ride apiece with him. The story line is good. The pictures are cute and well-illustrated. The math concept taught here is finding an unknown for addition/subtraction facts. My children and I re-read all the books we own over and over. The children especially like "Bigger, Better, Best!" (MathStart 2) and "Give Me Half!" (MathStart 2). Perhaps the reason they like those is that the story line is about siblings interactions. But truthfully, we like all of them and read them on a regular basis.

they are kind of fun though, overall I am very satisfied with it without any quality problems more than satisfied with this product. The quality of this product is very good. After I bought it and use found no problems, I believe it is very durable. I often recommend friends to buy. Very pleased with the purchase! will purchase products from this company again, as needed.

Teaches math as the characters spend their tickets at an amusement park. Very cute illustrations. Stuart J. Murphy throws in a bit of good values training -- the other kids in the family must help the child who lost his tickets, and in the end he helps them back. Great book -- does what you want a math reader to do (teach a little math). Best of all -- it's entertaining and they re-read

it.This book is a winner.

Good book

The material in the book was too basic and not worth the almost \$10 (including shipping) that I paid for it. I did not the return it because my daughter said my grandson had liked reading it.

thanks
