In the words of Abraham Lincoln, "good things come to those who wait, but only those things that are left behind by those who hustle." In his new book "Hustle," Jesse Tevelow captures the true sentiment of this quote. Even the most educated and motivated individuals are bound by the same constraints of time and efficient energy management to be truly successful and fulfilled. Hustle and hard work is often the differentiator. If you have not read the "Connection Algorithm;" Read it! It will change you. "Hustle" further inspired me, and made me question some of the unfounded limitations that I have imposed on my own productivity. This book was written and published in 7 days, which takes vision, commitment, discipline, and courage. Regardless of your age, profession, or background, this book will challenge you to reconsider your action plan for applying your passion- to get things done. Read "Hustle!" Get moving, and stay moving.

I did not know what was Hustle Once I read the book I realized that it has a lot of good tips not only to write a book but in other aspects of life as well. Although I read a lot about self motivation or self improvement, I still could extract few suggestions from this book, being the most important: to hustle.

The book for me is mostly inspirational. While it have some techniques and tips for moving forward, in my case it was a source of inspiration to move even faster. I discovered that some things I do are qualities of hustlers, and others are detrimental to my success. One particular part that I found useful is that you should do a step and then another, not plan for 100 steps ahead because you will overwhelm yourself and most of the time you will fail at following that plan. Start moving more and planning less, that's a hell of advice!

This is a surprisingly well written book, for one done in a hurry. It has some classic insights from other authors, and a few new-to-me ideas. I don't agree 100% with him; for example, he says planning has no value because life changes in unexpected ways. I think you should just plan in such a way that gives room for changes (e.g. specific for 90 days and loose after that). But he also shares some big ideas. For example, he says that we no longer connect with influential gatekeepers and then create good stuff. It's reverse. Your good creations are what facilitate you connecting with influential gatekeepers. Great read for anyone trying to accomplish something significant with their life.

A lot of people talk about hustle, but very few explain it (or demonstrate it). This book tells you why hustle is important and then shows you what is possible when you combine focus and hustle. It made me realize that writing my first book does not have to be a long drawn out process, if I just commit and get going.

Straight up that book spoke to me. I have been hustling for years but never really said it because I always thought hustling was wrong and I always thought corporate work was a better avenue for me but it doesn't speak to my spirit. I am a creator. I find solutions. After having my oldest son, I wanted to stay home with him because I didn't trust daycares so I set up a table at a barbershop and sold hard to find books, incense, body oils. It provided now money so we were never without. When I was at home with my twins after having them I couldn't work outside the home so I asked myself "what can I do from right where I am with what I already have?" and it came to me that I do hair. So I built a clientele from Myspace and have been doing hair from home ever since. The hair business is real up and down and when my money runs low and I start to panic I figure out something else to do that can generate money. I now do photo shoots for folks. I have been taking pics since my oldest was born and he's 18 now but I didn't start getting paid until a year ago. I am also a spoken word artist and have been performing for over 16 yrs so that's my main work. I have 4 beautiful boys and folks on the outside might say I should have a job more steady but I like all that I do. I get to connect with folks. I build business relationships and I have repeat business. I've built a name for myself. Your book hustle told me that I am normal, it gave me more to work with and on top of all that it was easy to read, oh and it was short. I read it over a few days maybe more only because when you would hit a spot I would marinate on it for a day and put the knowledge to work. So thank you and congrats on writing that book in such a short period of time. You definitely confirmed that you don't always have to do it their way to make it happen.

Absolutely NOTHING new from the millions of self help motivational gurus out there except this one is told in one of those cheeseball over selling styles. I'm stunned that this is a best seller. It follows all the cheeseball marketing templates of the moment. Even worse, like pyramid schemes, he's got the link to his website in the intro - like page 1 that works to loop you in to his site to get some free stuff that then entices you to buy more of his stuff. Just re-read your Tim Ferris or Tony Robins, or.....or.....look on your book shelf for stuff you already have and put it to use.

This one was first introduction to Jesse and his "hustle" mindset. When I read this was an experiment in a 7 day start to finish project, I became a little leary, but also intrigued. Admittedly, I was extremely surprised by how well his thoughts and strategies were organized, the very enjoyable "voice" of the book, the highly useful tools he suggests, and above all.. motivated to not just hustle as I've always done, but direct my hustle into action. It's obvious this isn't a first timers attempt at throwing a quick book together and Jesse has a deep toolkit to draw from, but it is a great addition to my own personal toolkit, and I'm already looking forward to reading his other books based on how good this one was. Get your hustle on!
