Customer Reviews

I can't believe I'm leaving a review based on this, but it's hard to ignore...the content is fine, as expected. But the smell! Why on earth would there be a fragrance attached to a brand new study sheet? I can only deduce that either keeps this in their warehouse next to laundry dryer sheets or somebody returned theirs after infecting it with scents, and re-sold it as new, even though it's in a "used" state. Because there's a headache-inducing fragrance attached to it that can't be washed off with vinegar, soap or water. And it's on a handful of others of these BarCharts pamphlets we bought, too. We're thinking sending it back for an exchange will likely result in another round of the same issue. Which leaves us scrubbing and scrubbing at these repeatedly in hopes the scent will improve. In the future, I wouldn't buy these on . I'd buy them at the publisher's own website, because I avoid used books so we don't have to deal with stuff like scents, cat hair (allergies!), etc.

Great math review.

This has been very useful for math class in college. It is a great reference to look at when you need to refresh your mind on those math rules. I would recommend this as well as any of the quickstudy sheets. They are very useful.

grand son use

Thank you!

this was a very helpful item .it was in good shape and arrived early ,it has really helped my kid with home work

This arrived on time and as I expected it. This is great to put into a binder for quick access when studying.

Very concise and informative.
