Age Range: 6 and up

Grade Level: 1 and up

Customer Reviews

CIENCE ACTIVITIES title, presenting a colour illustrated exploration of the properties and basic scientific principles of water, with simple but safe experiments and games.

I homeschool my two boys and I purchased this book to incorporate some hand-on science into our curriculum. After looking through the book, we are very excited to begin experimenting! :)

Neat little science book

This book sucks. We tried to use it for science for homeschool. Excerpt for melting ice the experiments didn't work. And many of them require unusual items that require a special shopping trip. Don't waste your time or money.

My son was given this book as a gift and I managed to prise it off him to do the experiments with the

children's group I was leading. We did 4 of them and found them clear and easy to follow. The children loved them! Made a great start to our activities on the colour blue!
