"An essential book for every garden and kitchen." "Nigel Slater, Observer Magazine

Charles Dowding has been growing organic vegetables commercially for 30 years, without soil cultivation. He is the author of *How to Grow Winter Vegetables* and *Organic Gardening*. He also writes articles for several gardening publications, lectures, and runs courses on how best to look after soil and plants.

I am really into growing lettuce right now, so this was very informative for me.

A nice book, informative, priced right! 5 bright stars!

Beautifully illustrated book with great colorful salads...for the health nut!

Excellent

Book aimed at UK audience but I had no problem applying the information to my temperate climate in the U.S. What I like the most was the detailed information about what the plants looked like, tasted like, when they grew best, how to grow for leaf or entire plant harvest. I want to incorporate more salad greens into my diet and this book, I believe, will make it possible!

Directions for growing and recipes are easy to follow. Divided into growing times with recipes in each section. I will bring to market to help patrons get ideas for eating. I will also use to try new lettuce types. Not just lettuce which is really nice.

Review on 'Salad Leaves for All Seasons' - Charles Dowding
For those who purchased, perused, and put into practice Dowling's earlier book, 'Organic Gardening - The No Dig Natural Method', there is now more good news. His book, 'Salad Leaves for All Seasons', is as valuable to an organic gardener as the first. This year's 2009 growing season has proven it's worth, and the know how Dowding gives you works without a lot of expense and back breaking labor. We have watched the price of green groceries go up as world wide economic conditions go down. Some of us have to eat a green salad every day (and all of us should) for good health. 'Salad Leaves for All Seasons' tells you how to grow your own in plain English. In a very cost effective manner, this book frees you from a grocery cooler shelf looking at price prohibitive items laden with more and more poisons as time goes by. You do not have to endure price or poisons when you find out how easy it is to grow your own. Dowding has been an organic grower for over 25 years and lets you draw from his well of practical knowledge. I've grown tired of buying books that promise much, but do not deliver. 'Salad Leaves for All Seasons' is exactly what the title says it is. It does not leave you wondering why you spent your hard earned cash to purchase it. The book is an investment, not an expenditure, and should provide a return on the investment. The information in it is useful and worth keeping, enough said. Burton Dale

This book has a look that encourages spending time in its pages...I look forward to doing just that!
