Customer Reviews

From Jacket: "This book presents plans for seventy-six easily built, low-cost pulling (rowing), power, and sailboats."

There are designs in here as well as in his V-bottom book that can not be found elsewhere. Simple and straightforward designs that can be built in modern methods provided the builder is familiar with such practices. Plans can be purchased from National Museum of American History but you should purchase their catalog of ship plans first. Well worth it.

I highly recommend this book to anyone interested in all types of flat bottom boat construction. Excellent detail and informative text as well as great line drawings throughout the book, well worth adding to your boat building library.
