Good text book. Could have used a little more proof reading before it was finalised for publishing. Lots of errors and mix ups such as on page 109. There is a comparison between metabolic enzymes in men and women.. in the yellow box below the image of a woman holding a wine glass. It says "women have less of an enzyme... than women do." It should say than men do. There are a few other mistakes similar to that one. Otherwise it has good information.

This is not a very good textbook.

Book was in great shape when it arrived

This is a school textbook so I doubt anyone is buying this for a good read. But it's got a lot of great pictures, graphs and side notes that make it enjoyable. I like it.

Didn't learn much in my online class but this book has easy to use referencing and nice paper. 10/10 was bored in the class.
