Gregory R. Beabout is Associate Professor of Philosophy at Saint Louis University. Daryl J. Wennemann is Assistant Professor of Philosophy at Fontbonne College in Saint Louis.

This was the first ethics book I've read. From a developmental approach, it provides fairly good insight towards certain situations regarding what people should know before making decisions. Would recommend to others as it takes a few approaches from psychology and also breaks it down to make ethics/morals more understandable for others to learn and apply. Thanks to the seller who

sold a new book for a better price. The book did arrive with minor damage but I assume that was the shipping process.

Easy to read, and it offers a wide variety of examples for a premium learning experience. Definitely a must read if you plan on going into a career that involves yourself making important decisions that involves a lot of people, for example, Airline pilot, Doctor, Lawyer etc.

I liked this book

Great resource!Thank You!

Great book, brings a lot of insight into various psychological perspective and a great basis to evaluating ethics as a professional in the work place, I like to read it just because it is interesting information although it is also helpful at work.
