Customer Reviews

James Tyler Kent, A.M., Chicago, Illinois, Professor of Materia Medica in Hahnemann Medical College, Chicago physician and author of several valuable medical works, His contributions to the literature of the profession are known by their strength rather than their length, and include, more prominently, his "Repertory", "Homoeopathic Philosophy" and "Lectures on Materia Medica Kent died, on June 6, 1916 at Stevensville, Montana.

The Kent Repertory is a valuable classic for professional and student homeopaths. The Indian publisher (Jain) produces physically lower-quality books than we may like but they are more affordable than Western editions. I gave this book 4 stars as a compromise between 3 (for durability and paper quality) and 5 (for usefulness).

Great resource.

Great

On time and in the condition promised. I will enjoy it for many years to come. Thank you for the

great service.

great

The text is difficult to read, and is smudged in some places making it impossible to read. The index markers are not consistent in any way. Some have a tiny font size while others are much larger. In fact the fonts throughout the entire book vary in ways that defy logic. Some change in the middle of a sentence! While the book contains much valuable information, this edition is of such poor quality I would recommend buying a different version, if it exists. I am extremely dissatisfied in mine.

This is a really cheaply printed, poor quality version of Kent's Repertory. It is in a hard-to read, poorly spaced typeface, the ink is smudgy, the pages are thinner than newsprint, and the finger tabs are inconsistently labeled (some have stickers on them and some are just printed right on the page). The pages feel bad and the book smells like cheap ink and mothballs. The jacket here is also not what you get, it is a plain black cover with ugly yellow type. I guess you get what you pay for...

I bought this book for a reason. This is not a reading book it nor it can teach you homeopathy. It won't help you become a homeopath. If you have experience in homeopathy or doing some 2 or 4 years course in Homeopathy. This is the book for you. It will help you to choose the remedy. Basically this book is a list of all possible symptoms and for each symptom there are more than one homeopathy medicine. It may sound tempting but by just buying this book you may never be able to find the correct remedy. The first step (I didn't take this advice seriously) is to read and understand the art and science of taking homeopathic cases understanding words like Rubric, Modalities work with more experienced homeopath. Master the technique of understanding and individualizing the symptoms; then we are talking. I wish someone had given this info before...
