National Geographic Readers: Spiders

Synopsis

You don't have to look far to see a spider's web "in the corner of the window, on a fence, or in a bush" spiders make their homes everywhere. And there are so many kinds of spiders! Some red, some blue, yellow, and more "all fascinating. Amazing photography and easy-to-understand text make *Spiders* a hit in this National Geographic Kids series.

Grade Level: Kindergarten - 3

Customer Reviews

LAURA MARSH is a long time contributor to National Geographic Children Books. She has written a large number of books in National Geographic Readers series and also in Mama Mirabelle and Toot and Puddle series.

I teach preschool and I love these Nat geo readers. They are a great way to give the kids a bunch information without overwhelming them. They also include jokes which is a major plus for my class. Every time we read one they ask for a joke. Great buy for our Insect Investigation.

I purchased for my 3 yr old because of his interest in spiders and he loves this book!! We have a

few national geographic readers books and we enjoy all of them. I would like to have seen more facts in the book - my little one has a ton of questions when he looks at the pictures.

My son loves talking about the spiders in this book. We really enjoys looking at the different webs and now identifies them on our hikes.

My grandson enjoyed this book

Great

Grandson put his surface down to read the entire book!

My 3 yr. old granddaughter loves spiders, and she really learned a lot with this book!

My 3 year old loves this book! He is really into spiders and it is hard to find one for kiddos. The pictures are captivating and the information is easily understandable.
