The Barbarian's Captive

Synopsis

End of Summer SciFi Sale Only \$2.99! A Hurry price good through 9/7 only! Light years from home, plant biologist Lt. Eva La Croix and her all-female exploration team land on a planet they believe is a perfect substitute for the dying Earth. They are set upon by huge alien hunters and Eva is captured by the barbarian leader. Deemed compatible, she and the rest of her team are whisked away to the barbarians' world where they are matched to these powerful men. While pampered and protected, the women are expected to comply with the rules in this male dominant society. Will Eva learn to adapt to their unusual beliefs and old-fashioned ways? Can she sacrifice her independence and surrender to this dynamic and commanding alien, or when escape is imminent, will she be able to set aside the claim he has on her heart and flee with the others, never to see him again?

Customer Reviews

Kerr is king of an alien planet in desperate need of females. Eva is a scientist on a ship with an all female crew. When Eva and her friends are kidnapped by Kerr and his men romance and adventure

ensues. Kerr is immediately drawn to the beautiful, blond female. He is insatiable with lust for Eva and can't keep his hands off of her. Eva is confused by the change of events in her life but knows she is drawn to Kerr. But not everyone is happy that their king is bonded to a strange female from another planet. This is a full length book and well worth the money. I loved the character of Kerr. He didn't resist his need for Eva and he was always patient with her. There is a lot of drama and romance in this book. I loved this new series and can't wait to read the next book in this series.

This story caught my interest and didn't let it go until the end which is atypical for me. I was sad to see it end. I found the universe interesting, not necessarily one I would want to live in, but interesting enough to visit for the duration of the story. I found the characters likeable. The author gave me enough information that I could see the story from both perspectives of the H and the h, making it a two-sided story. This is my first book from this author and I will look into other books written by this author in the future.

For all who love sci-fi romance/erotic books this I recommend highly. Great story line, it wasn't at all like I thought with another series that about barbarians and earth females. It was so much more. Great detail, good visual dialogue. Yes, the spanking seemed a little much, but I don't believe it took away from the main story at all. The characters are great, strong for both male and female leads. I have not read a book by this author, this was my first, but definitely I will look into her other books. Please don't let me wait long for the next book in this series.

I found this story to be well written and very descriptive with very likable characters. The story has some conflicts between the barbarians and the women from earth. I must say the first half was very boring for a while and then it started to get more interesting at the last half. The sex was very good as in all Maddie Taylor books and there were plenty spanking for the main character Eva. If you like sci-fi and good sex and hand spankings except for one scene where Eva gets whipped. A must read.

First, you can never go wrong with a Maddie Taylor book, and this one is no exception. I ordered the second book in the series as soon as I read the first chapter and finished both books in two days. This book has it all, hot dominant alien, strong human female lead, a little intrigue, clashing cultures, and compromises born of mutual attraction. Looking forward to learning more as the series continues.

The premise was intriguing, the plot was enjoyable, but I was really irritated by the women losing all sense of self and all their rightful rebellious anger in the instant the men touched them sexually. It was annoying. I wanted more fight. I wanted the men to be forced to see the women as equals, at the very least. Otherwise, I liked it very much.

Interesting and different. Kerr and Eva are from different worlds and culture. Eva has a difficult time adapting to her new world and culture. The new world is extremely different from Earth. So much information is going through Eva's brain that it takes time, energy, and thought for her to comprehend everything. Different but interesting.

i read book 3 in the series first. I liked it a lot not a lot of DD and a different plot-Eva and Ram. This is a sci-fi spanking fantasy series after all, so one cannot complain too much. In book one there is too much spanking and male dominance and not much else. The women captured are not given any choice - to save the species justifies this in the minds of the Primariens. Then biological changes occur after sort of forced mating so again there is no choice. Personally, analyzing the series to death is a waste of typing. Let it suffice to say pay attention to the sum of negative reviews on this one - they made very good points. By the end of book three, we still don't know what has or will happen with Lana and General Trask. I hope there is another book to figure that out. I just can't see treating women this way expecting obedience and not treating them as equals with choice and the right to be heard and to dress as they wish. But then this is just a Star Trek esque fantasy, and the real world is not entirely a paragon of sexual equality. I must also admit the series gives food for thought on many contemporary issues. If the Primarians move more towards what love really entails and less towards control, punishment, and obedience as it seems to be moving in book three, I recommend the series.
