Customer Reviews

Kim Gosselin was born and raised in Michigan where she attended Central Michigan University. She began her professional writing career shortly after her two young sons were both diagnosed with chronic illnesses. Kim is extremely committed to bringing the young reader quality children's health education while raising important funds for medical research. Kim now resides, writes, and gives consultations. Kim is the recipient of the 1998 National American Lung Association Presidential Award. She is an avid supporter of the American Lung Association, the American Cancer Society, the Epilepsy Foundation of American, and a member of the American Diabetes Association, the Juvenile Diabetes Foundation International, the Society of Children's Book Writers and Illustrators, the Small Publishers Association of North America, the Publishers Marketing Association, and the Author's Guild.

Our endocrinologist let us borrow this book to read in the hospital. While the hospital staff offered a

very thorough technical education to my husband and I, as an elementary teacher, I wanted to make sure my six-year-old had a better understanding (on her level) of what was happening to her. After we read it in the hospital, I ordered it on , so it was waiting when we got home from the hospital. We really appreciated using this book first as a tool for our daughter's own understanding and then as a resource for her teacher to read to her classmates to read in her first grade class after she returned to school.

This book is perfect in every way! My son has been type 1 one for two years now, and off to K5 in less than a month - how scary! This is the perfect book to be read to his classmates so they can learn a bit about diabetes. The language describing his condition is clear and simple, as is telling a bit how he takes care of himself. It's very clear and reassuring to his new friends that he's still like everyone else, even though he does some different things. The book covers insulin pumps, too, which is great. We will be taking this book to school at the beginning of this school year - as well as many to come!!!

Sent this to my Grandson who was just diagnosed with type 1 Diabetes. He is 9 years old and it was very helpful.

Great easy book for kids to understand their diabetes. My daughter loves it and interprets and recites it back to me every day when we read it. Love the little questionnaire at the end also.

What a great book to introduce diabetes to your child's friends. I read it to my son's 2nd grade class & it cleared up a lot of questions they all had. So grateful to have had this to help him during a difficult time.

Fast delivery and great quality. This is a great book to introduce children to diabetes education. It show a child who has a diabetes pump as well as one who takes insulin shots. Great lesson for all children!

First time I opened the book the pages fell out.

This was my personal favourite standout book from the 5 or so diabetes related books I have ordered. It is a simply written picture book suitable for all ages of primary school children that

demystifies diabetes in a way that is cool and easy to understand. It could be read quite easily by the teacher to the class or by the children. The main character does not wear an insulin pump but he has a friend in the book who does so both insulin pump wearing and injection therapy are well covered in this book. I think what I liked best about this book is the ten top tips for teachers at the back of the book- this is gold and would make a great gift for any teacher for their classroom library.
