Pediatric Education For Prehospital Professionals (PEPP)

Synopsis

Pediatric Education for Prehospital Professionals, Third Edition represents a comprehensive source of prehospital medical information for the emergency care of infants and children. PEPP is designed to give prehospital professionals the education, skills, and confidence they need to effectively treat pediatric patients. Developed by the American Academy of Pediatrics, PEPP specifically teaches prehospital professionals how to better assess and manage ill or injured children. PEPP combines comprehensive medical content with dynamic features and an interactive course to fully prepare prehospital professionals to care for children in the field. New to The Third Edition: The textbook content addresses every pediatric-specific competency in the National EMS Education Standards Shock and resuscitation content is covered in two separate chapters, placing more emphasis on these critical topics A top-flight EMS author team working in conjunction with AAP physician reviewers ensures exceptional medical content with a "street" focus Features Include: The Pediatric Assessment Triangle (PAT) represents the essence of the PEPP patient assessment method, which includes assessing appearance, work of breathing, and circulation to the skin The Patient Assessment Flowchart provides students with an easy-to-understand reference of the pediatric patient assessment process Case studies provide an opportunity for critical thinking and encourage students to consider how they would treat a similar case in the field Procedures provide written step-by-step explanations and visual summaries of important BLS and ALS pediatric skills Interactive Course and Flexible Course Options PEPP Course Coordinators now have the option of offering onsite or hybrid courses The hybrid course includes engaging, interactive online modules that students complete before attending the onsite portion of the course for scenarios and hands-on skill stations The onsite course includes case-based lectures, live-action video, small group scenarios, and hands-on skill stations The BLS course is geared toward Emergency Medical Responders and EMTs, while the ALS course is ideal for AEMTs and Paramedics.

Customer Reviews

Time to recert. Bought new, received new. Very pleased.

Improves on the prior editions and makes it easier to look up specific types of conditions. I'll keep this one in my library.

This was an optional book for my Paramedic class. It arrived earlier than expected and in excellent condition, but the book itself isn't that useful. I wish I'd put my money elsewhere.

Great for the EMT, more in-depth information on pre-hospital pediatric care.

I should write a bad review, because I hate school and textbooks, but it was in good condition

We use them in our PEPP class. We bought them from (instead of direct from the publisher) as had the best pricing.

love it

Excellent
