How Cities Work (Lonely Planet Kids)

Synopsis

Get ready to explore the city in a whole new way. This innovative book for younger readers is packed with city facts, loads of flaps to lift, and unfolding pages to see inside buildings and under the streets. Children aged 5+ can learn about skyscrapers, subway systems and stinky sewers. Discover where people live and peek behind closed doors to see what's going on in houses and apartments, or why not find out about what goes on underneath the streets you walk on every day? Each page is stylishly illustrated by James Gulliver Hancock, creator of the All The Buildings That I've Drawn So Far series (Universe Publishing) and there are loads of quirky details to spot. How many giant cowboy hats can you find through the book? Created in consultation with Jill Sterrett, lecturer with the department of Urban Planning at the University of Washington. Contents : The birth of a city In and out of the city City living Build, build, build! High-rise life Green spaces Going underground City hall Emergency services Recreation and culture Night and day Cities of the future About Lonely Planet Kids: From the world's leading travel publisher comes Lonely Planet Kids, a children's imprint that brings the world to life for young explorers everywhere. With a range of beautiful books for children aged 5-12, we're kickstarting the travel bug and showing kids just how amazing our planet can be. From bright and bold sticker activity books, to beautiful gift titles bursting at the seams with amazing facts, we aim to inspire and delight curious kids, showing them the rich diversity of people, places and cultures that surrounds us. We pledge to share our enthusiasm and love of the world, our sense of humour and continual fascination for what it is that makes the world we live in the diverse and magnificent place it is. It's going to be a big adventure - come explore!

Geography & Cultures > Cultural Studies > Sociology #45 in Books > Children's Books >

Geography & Cultures > Travel

Age Range: 8 - 12 years

Grade Level: 3 - 7

Customer Reviews

Gr 3-6 "Employing cartoonlike drawings, Feroze introduces elementary students to the evolution of a nameless city from its small, humble beginnings to a thriving metropolis. The book begins with a drawing of a tiny village with a river, fields, pastures, and a few buildings. Over the next several pages, readers see the locale grow as more structures are built, more people move in, and civil services such as police and fire departments are created. High-rises, recreational opportunities, and parks are also presented. Finally, the author provides a vision of how cities may look in the future. The addition of foldout pages and flaps enhances the reading experience. The intricate, colorful drawings, dominated by gray and green hues, are the primary attraction and are aptly complemented by the writing. VERDICT The detail in the illustrations and text makes this an attractive offering to children and superior to other titles, such as Esther Porter's *Peeking Under the City*." Margaret Nunes, Gwinnett County Public Library, GA

"Likely to prompt young city dwellers to a broader understanding of their environment." (Kirkus Reviews)"This upbeat and thorough guide to what makes a city a city lets readers peek inside buildings, vehicles, and various attractions." (Publishers Weekly)"The detail in the illustrations and text makes this an attractive offering to children." (School Library Journal)"It's Richard Scarry grows up and meets urban planning." (Shelf Awareness)"This clever guide to the inner workings of a big city will provide long and lasting activity to the young and inquisitive mind." (Story Monsters Ink)

I bought this for my 5 year old for Christmas and he absolutely loves it. Nearly every day he pulls it out and studies a different section of the book. The pages have little doors to discover and some of the pages fold out to see a city block or a skyscraper. Some of the words are a little difficult for my child but he loves learning about how cities work. Great job, lonely planet!

Fabulous book with lots of detail!
